COURSE PROJECTS

- | | |
|-----------|---|
| 2024-2025 | Biology Experimental Project, Clovis Community College, Fresno, California <ul style="list-style-type: none">• Designed and conducted field-based behavioral experiment examining Argentine ant (<i>Linepithema humile</i>) sugar preference. |
|-----------|---|

- Compared ant attraction to natural sugar sources (fruit/banana) versus processed sugars (sucrose-based foods/gummy bear).
- Collected and quantified observational data across 20 trials and analyzed trends through Posit Cloud.

2025

Environmental Health & Water Quality Research Project, Clovis Community College, Fresno, California

- Conducted collaborative academic research examining water quality, environmental health disparities, and access to safe drinking water within California's Central Valley.
- Investigated relationships between environmental exposure, socioeconomic factors, and community health outcomes through water sample analysis and community-based data collection.
- Measured and analyzed pH and parts-per-million (PPM) levels from local water sources, including lakes and regional water samples from areas such as Modesto.
- Designed and conducted a community poll assessing demographics, perceptions of local water quality, and public concerns regarding water accessibility and safety.
- Synthesized scientific literature related to environmental justice, water contamination, and public health impacts in underserved communities.

COMMUNITY INVOLVEMENT & LEADERSHIP

2026-Present

Student Advocate's Office Volunteer Caseworker, Associated Students of the University of California

- Support students navigating academic and interpersonal grievances through case intake and resource navigation
